OBJECTIVE

As a final-year ECE student, I'm well-prepared to contribute to both IT and core engineering roles. My technical skills and dedication to learning make me a versatile candidate ready to tackle challenges and drive innovation in the tech industry."

EDUCATION

New Horizon College of Engineering
Bachelor of Engineering — 7.46

BLDEA'S SSM Polytechnic Vijayapur — 2021
Department of Technical Education — 64.55

PDJ 'A' High School Vijayapur — 2017
KSEEB — 66.88

WORK EXPERIENCE

Rinex Technologies — Jul 2022 — Sep 2022
Intern
Completed The Internet of Things and Robotics **internship i**n the month of 11 July 2022 to 11 September 2022 at **Rinex Technologies.**

PROJECTS

Anti Sleep Detection Goggles — Jan 2022 — Mar 2022
The main aim of the project is to develop a device that can detect sleepy driver and make sound accordingly, and which prevent the drivers from drowsiness and create a safe driving journey.

Car Parking System Using Arduino UNO — Apr 2022 — Jul 2022
A car parking system using Arduino UNO is a smart and automated solution for managing parking spaces. It typically involves ultrasonic sensors to detect vehicle presence and an LCD display to show available parking spaces. The system can guide drivers to vacant spots and keep track of occupied spaces, making parking more efficient and user-friendly.

Land and River Cleaning Robot — Oct 2023 — Present
The project involved integrating various sensors for obstacle detection, water quality analysis, and pollution identification. Developed control algorithms for navigation on both land and water and implemented a versatile cleaning mechanism. The robot successfully demonstrated its ability to clean litter and debris in diverse environmental conditions, contributing to environmental conservation and pollution mitigation.
